Allowable Subject Matter

Claims 1-55 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited art taken alone or in combination does not fairly teach multi-break point group in multi-threaded environment. Specifically, claims 1, 6, 11, 16, 21, 26, 31, 34, 38, 44, 49 and 53 are directed to saving a plurality of values for a variables after a respective plurality of encounters of breakpoint by a program that modifies the variables; selecting one of the plurality of values based on a condition, determining whether to stop execution of the program at the breakpoint based on the one of the plurality of the values, if the determining is true stopping execution of the program at the breakpoint and if the determining is false allowing the program to continue to execute. Cited art recites user may set a breakpoint at a particular node when the execution path of a thread reaches the breakpoint, execution of the program stops until user indicates that execution to continue but does not suggest a conditional breakpoints associated with a time that breakpoint to be encountered and specific time. Therefore, it improves on debugging the programs, saving time and allows software productivity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
